

**Consequences of Brexit for the labeling of construction products in accordance with Article 2 No. 1 of the European Construction Products Regulation (EU-BauPVO); status: July 8th, 2021****Here: Recognition of test results in the system 3**

It has now been more than 5 months since Great Britain ceased to be a member of the European Union.

You as the manufacturer and we as the conformity assessment body now have to face the new challenges. Among other things, it is necessary to implement the changed requirements with regard to the labeling of construction products.

Unfortunately, the British government has not yet provided a final clarification of all processes. There is currently no established procedure for handling existing test results from a notified body, as is the case in system 3.

We are aware of the problems resulting from this situation and will inform you as soon as we receive new information.

Since May, we have the opportunity to use the expertise of our cooperation partner. Further information can be found on our homepage. The colleagues at MPA NRW will also be pleased to assist you.
